Executive Summary

Cybersecurity-focused B.Sc. Information Technology student with hands-on experience in vulnerability assessment, SIEM monitoring, phishing analysis, and network security. Proficient in Python, Splunk, Wazuh, Nmap, Nessus, Wireshark, and security analysis in controlled lab environments. Brings strong analytical, problem-solving, and teamwork skills aligned with SOC Analyst and entry-level cybersecurity roles. Eager to contribute to threat detection, incident response, and security operations.

Technical Skills:

- **Programming Languages:** Python, Bash, C, C++, HTML, CSS
- **Security Tools:** Nmap, Nessus, Metasploit, Wireshark, Burp Suite, VirusTotal API
- **SIEM & Monitoring:** Splunk, Wazuh, Log Analysis, Alert Monitoring
- **Networking & Security:** TCP/IP, DNS, VPN, Firewalls, IDS/IPS, Network Security
- **Operating Systems:** Windows Server, Linux, Ubuntu, Kali Linux
- **Cybersecurity Concepts:** MITRE ATT&CK, NIST, Incident Response, Threat Hunting, Digital Forensics, Vulnerability Management
- **Virtualisation:** VMware, VirtualBox
- **Cybersecurity Platforms:** TryHackMe, Hack The Box

Soft Skills:

- Communication and Teamwork
- Analytical Problem Solving
- Time Management
- Adaptability
- Ability to Work Ahead of Schedule
- Languages: Tamil — Native; English — Fluent

Professional Experience:

Jamal Mohamed College, Trichy, Tamil Nadu 2024 – Present

Role: Academic Project Contributor — Cybersecurity

Responsibilities:

- Built a virtual Security Operations Centre environment using Splunk and Wazuh.
- Configured log ingestion from Windows and Linux endpoints, firewalls, and a honeypot.
- Created custom correlation rules to identify suspicious security events.
- Developed dashboards to monitor brute-force login attempts, port scans, and malware beaconing.

- Analysed security logs to support threat detection and basic incident-response activities.
- Used VMware, VirtualBox, Kali Linux, and Ubuntu to create controlled cybersecurity lab environments.

Impact:

- Developed a multi-source SOC monitoring environment integrating Windows, Linux, firewall, and honeypot logs.
- Created detection coverage for three key threat scenarios: brute-force activity, port scanning, and malware beaconing.
- Strengthened practical skills in SIEM operations, alert analysis, and threat monitoring.

Jamal Mohamed College, Trichy, Tamil Nadu 2024 – Present

Role: Academic Project Contributor — Network Vulnerability Assessment

Responsibilities:

- Performed reconnaissance and vulnerability scanning on a simulated enterprise network.
- Used Nmap and Nessus to identify network services, exposed ports, and security weaknesses.
- Conducted controlled security testing using Metasploit and Wireshark.
- Analysed identified vulnerabilities and configuration weaknesses.
- Applied CVSS scoring to assess vulnerability severity and prioritisation.
- Prepared remediation recommendations to reduce identified security risks.
- Documented findings in a structured vulnerability assessment report.

Impact:

- Identified more than 20 security misconfigurations in the simulated network environment.
- Produced a formal assessment report with risk ratings and actionable remediation guidance.
- Improved hands-on capability in vulnerability assessment, network analysis, and security reporting.

Jamal Mohamed College, Trichy, Tamil Nadu 2025

Role: Academic Project Contributor — Phishing Email & Header Analysis Toolkit

Responsibilities:

- Developed a Python-based toolkit to analyse email headers.
- Extracted indicators of compromise, including IP addresses, URLs, and file hashes.
- Identified potentially spoofed sender domains from email-header information.
- Integrated the VirusTotal API for automated reputation checks.
- Analysed extracted indicators to support phishing investigation and threat triage.
- Applied scripting and threat-intelligence concepts in a controlled cybersecurity project.

Impact:

- Automated the extraction and reputation analysis of multiple indicator types.
- Reduced manual effort involved in reviewing email-header information.
- Strengthened practical skills in Python scripting, phishing analysis, and threat intelligence.

Education

Bachelor of Science in Information Technology with Cyber Security

Jamal Mohamed College, affiliated with Bharathidasan University, Trichy 2024 – 2027

CGPA: 6.60 / 10

Relevant Coursework: Data Structures, Cryptography, Ethical Hacking, Digital Forensics, Operating Systems, and Computer Networks

Higher Secondary (Class XII) — Computer Science

Punitha Arockia Annai Higher Secondary School, Tamil Nadu State Board 2023 – 2024

Awards & Accomplishments

- Ranked in the top 9% on the TryHackMe SOC Level 1 learning path, completing more than 50 rooms.
- Finalist, Inter-College Capture the Flag Competition — 2025.
- Active member of the College Cybersecurity Club and co-organised two phishing-awareness workshops.
- Completed cybersecurity challenges on TryHackMe and Hack The Box.
- Completed HackQuest CTF Challenge — 2026.
- Completed Robotics Process Automation training — 2025.
- Completed a Communication Course — 2024.
- Received the Best Photographer Award — 2023.

Certifications

- Communication — Issued 2024
- HackTheBox — In Progress
- TryHackMe — In Progress
- HackQuest — Issued 2026
- Hackdemy — Issued 2025
- Robotics Process Automation (RPA) — Issued 2025
- MongoDB — Issued 2025
- World Record Certificate — Issued 2025
