JAVID AHAMED J

Cybersecurity Analyst | SOC Analyst | Vulnerability Assessment | Security Operations

Ph: +91 70107 94258
Mail: javidahamedx@gmail.com
Location: Thanjavur, TamilNadu, India
Linkedin: linkedIn.com/in/javid-ahamedx
GitHub: github.com/cyberpatrick007
Portfolio: javid-ahamed-j.vercel.com

Executive Summary

Cybersecurity-focused B.Sc. Information Technology student with hands-on experience in vulnerability assessment, SIEM monitoring, phishing analysis, and network security. Proficient in Python, Splunk, Wazuh, Nmap, Nessus, Wireshark, and security analysis in controlled lab environments. Brings strong analytical, problem-solving, and teamwork skills aligned with SOC Analyst and entry-level cybersecurity roles. Eager to contribute to threat detection, incident response, and security operations.

Technical Skills

- **Programming Languages:** Python, Bash, HTML, CSS.
- **Security Tools:** Nmap, Nessus, Metasploit, Wireshark, Burp Suite, VirusTotal.
- **SIEM & Monitoring:** Splunk, Wazuh, Log Analysis, Alert Monitoring.
- **Networking & Security:** TCP/IP, DNS, VPN, Firewalls, IDS/IPS, Network Security.
- **Operating Systems:** Windows Server, Linux, Ubuntu, Kali Linux.
- **Cybersecurity Concepts:** MITRE ATT&CK;, NIST, Incident Response, Threat Hunting, Digital Forensics, Vulnerability Management.
- **Virtualisation:** VMware, VirtualBox.
- **Cybersecurity Platforms:** TryHackMe, Hack The Box, CyLab, Hackdemy, PicoCTF.

Professional Strength

- **Communication and Teamwork**
- **Analytical thinking And Problem Solving**
- **Technical Documentation**
- **Security Reporting**
- **Attention to detail**
- **Time Management**
- **Adaptability**

- **Ability to Work Ahead of Schedule**

Professional Experience:

Jamal Mohamed College, Trichy, Tamil Nadu 2025 – Present
Role: Academic Project Contributor — Network Vulnerability Assessment

Responsibilities

- Performed reconnaissance and vulnerability scanning on a simulated enterprise network.
- Used Nmap and Nessus to identify network services, exposed ports, and security weaknesses.
- Conducted controlled security testing using Metasploit and Wireshark.
- Analysed identified vulnerabilities and configuration weaknesses.
- Applied CVSS scoring to assess vulnerability severity and prioritisation.
- Prepared remediation recommendations to reduce identified security risks.
- Documented findings in a structured vulnerability assessment report.

Impact:

- Identified more than 20 security misconfigurations in the simulated network environment.
- Produced a formal assessment report with risk ratings and actionable remediation guidance.
- Improved hands-on capability in vulnerability assessment, network analysis, and security reporting.

Jamal Mohamed College, Trichy, Tamil Nadu 2025 – Present
Role: Academic Project Contributor — Network Vulnerability Assessment

Responsibilities

- Developed a Python-based command-line toolkit to automate the first-pass analysis of suspicious `.eml` files.
- Parsed email headers and analyzed **From, Reply-To, Return-Path, Received chain, SPF, DKIM, and DMARC** information.
- Extracted Indicators of Compromise (IOCs), including **IP addresses, URLs, domains, and MD5/SHA-1/SHA-256 hashes**.
- Implemented sender-spoofing detection using domain mismatch and lookalike-domain analysis.
- Integrated the **VirusTotal API v3** for automated reputation checks of extracted indicators.
- Implemented transparent risk scoring to support phishing detection and threat triage.

- Generated structured **JSON and analyst-readable text investigation reports**.
- Applied Python scripting and threat-intelligence techniques in a safe, controlled cybersecurity environment.

Impact

- Automated the initial extraction, analysis, and enrichment of multiple phishing-related indicators.
- Reduced manual effort involved in reviewing suspicious email headers and identifying potential spoofing indicators.
- Created an explainable risk-scoring workflow to support consistent phishing triage.
- Strengthened practical skills in **Python scripting, email security, IOC analysis, threat intelligence, and phishing investigation**.

Technologies: Python, VirusTotal API v3, Email Header Analysis, SPF, DKIM, DMARC, IOC Extraction, Spoofing Detection, Threat Intelligence, Risk Scoring, JSON

Jamal Mohamed College, Trichy, Tamil Nadu 2026 – Present
Role: Academic Project Contributor — Phishing Investigation Toolkit

Responsibilities

- Developed a Python-based SOC-style toolkit for investigating suspicious `.eml` phishing emails.
- Implemented email header parsing and extracted SPF, DKIM, and DMARC authentication results.
- Developed detection logic for Reply-To mismatches and other suspicious email indicators.
- Extracted Indicators of Compromise (IOCs), including URLs, IP addresses, domains, and file hashes.
- Performed static URL analysis and calculated MD5, SHA-1, and SHA-256 hashes for attachments.
- Implemented evidence-based risk scoring to support phishing email triage and investigation.
- Developed JSON evidence export and HTML-based investigation report generation.
- Built a FastAPI backend and analyst dashboard for uploading and analyzing email samples.
- Applied secure-analysis practices by avoiding automatic execution of attachments and suspicious URLs.

Impact

- Built an end-to-end phishing investigation workflow covering email analysis, IOC extraction, evidence collection, and risk assessment.
- Improved hands-on skills in Python automation, SOC investigation, phishing analysis, IOC analysis, and security reporting.
- Created a reusable security-analysis tool with structured evidence output and investigation reporting capabilities.

Technologies: Python, FastAPI, HTML, Email Header Analysis, SPF, DKIM, DMARC, IOC Analysis, URL Analysis, Hash Analysis, JSON, HTML Reporting

Education

Bachelor of Science in Information Technology with Cyber Security
Jamal Mohamed College, affiliated with Bharathidasan University, Trichy 2024 – 2027
Current CGPA: 6.60 / 10
Relevant Coursework: Data Structures, Cryptography, Ethical Hacking, Digital Forensics, Operating Systems, and Computer Networks

Higher Secondary (Class XII) — Computer Science
Punitha Arockia Annai Higher Secondary School, Tamil Nadu State Board 2023 – 2024

Awards & Accomplishments

- Ranked in the top 9% on the TryHackMe SOC Level 1 learning path, completing more than 50 rooms.
- Finalist, Inter-College Capture the Flag Competition — 2025.
- Active member of the College Cybersecurity Club and co-organised two phishing-awareness workshops.
- Completed cybersecurity challenges on TryHackMe and Hack The Box.
- Completed HackQuest CTF Challenge — 2026.
- Completed Robotics Process Automation training — 2025.
- Completed a Communication Course — 2024.
- Received the Best Photographer Award — 2023.

Cybersecurity Platforms & Hands-on Areas

Platforms: TryHackMe, Hack The Box, PicoCTF, CyLab, Hackdemy
Hands-on Areas: SOC Fundamentals, CTF Challenges, Network Reconnaissance, Vulnerability Assessment, Phishing Investigation, Web Security Fundamentals, Linux Security, Network Analysis

Certifications

- Introduction to Cybersecurity— **CISCO** — Issued 2026
- Communication — **Jamal Mohamed College**— Issued 2024.
- Reconnaissance for Cyber Application Security — **Cyberheals** — Issued 2024.
- Internship at Skywin Academy — **Skywin IT Academy** — Issued 2025
- Workshop on Mastering ESP8266 for Smart loT Appli — **JMC** — Issued 2026
- Certified Cybersecurity Foundations — **Hackviser** — Issued 2026
- Robotics Process Automation (RPA) — **Jamal Mohamed College** — Issued 2025.
- Protecting a Device with Malwarebytes — **IBM Skill Build** — Issued 2026
- Thinking Practitioner certification — **IBM Skill Build** — Issued 2026
- MongoDB Basics for Students — **MongoDB** — Issued 2025.
- Network Enumeration With Nmap **Hack The Box** — In Progress.
- Security Analyst — **TryHackMe** — In Progress.
- HackQuest CTF — **Cyber Heals** Issued 2026
- Hackdemy Challenges — **Cyber Heals** In Progress.
- World Record Certificate — **Genius International Book of Records** Issued 2025.

Language

- **Tamil — Native**
- **English — Intermediate**

Career Objectives

Seeking an entry-level Cybersecurity Analyst / SOC Analyst opportunity where I can apply hands-on experience in vulnerability assessment, phishing investigation, IOC analysis, network security, Python automation, and cybersecurity labs while developing stronger capabilities in SIEM, threat detection, incident response, and security monitoring. Long term, aiming to progress through Cybersecurity Analyst fi Security Engineer fi Security Architecture, with a future focus on Cloud and AI Security Architecture.
